Hasil Capture

The image shows a Flutter web application running in a browser at localhost:60384. The application is titled "Form Biodata Mahasiswa" and contains three text input fields for "NIM", "Nama Lengkap", and "Alamat Lengkap", each preceded by a person icon. A "Simpan Data" button is at the bottom. The background code in the IDE shows the Dart implementation of the form, including state management with `State<BelajarForm>`, form validation, and a `showDialog` call to display an alert.

The screenshot displays a web browser window with the address bar showing 'localhost:60384'. The page title is 'Form Biodata Mahasiswa'. The form itself is titled 'Form Biodata Mahasiswa' and contains three input fields: 'NIM', 'Nama Lengkap', and 'Alamat Lengkap'. The 'Alamat Lengkap' field has a hint text 'Contoh: Perumnas 1'. Below the fields is a 'Simpan Data' button. The background shows the VS Code editor with the Dart code for the form, including state management and validation logic.
